

5-6 marks
Correct structure given; reference to all information provided
The candidate constructs a relevant, coherent and logically structured account including key elements of the indicative content. A sustained and substantiated line of reasoning is evident and scientific conventions and vocabulary are used accurately throughout.

3-4 marks
Molecular formula obtained but insufficient chemical deductions to obtain the correct structure
The candidate constructs a coherent account including many of the key elements of the indicative content. Some reasoning is evident in the linking of key points and use of scientific conventions and vocabulary is generally sound.

1-2 marks
Some use of analytical results and / or chemical deductions but insufficient to suggest a structure
The candidate attempts to link relevant points from the indicative content. Coherence is limited by omission and/or inclusion of irrelevant material. There is some evidence of appropriate use of scientific conventions and vocabulary.

0 marks
The candidate does not make any attempt or give an answer worthy of credit.

one isomer rotates the plane to the left and the other to the right (1)

isomers present in equimolar amounts therefore the effect of rotation is cancelled out (1)
