4	(a)			<table><tr><th>Concentration of sodium thiosulfate (g / dm³)</th><th>Time 1 (s)</th><th>Time 2 (s)</th><th>Time 3 (s)</th><th>Mean time (s)</th></tr><tr><td>0.2</td><td>114</td><td>113</td><td>112</td><td>113</td></tr><tr><td>0.4</td><td>74</td><td>70</td><td>72</td><td>72</td></tr><tr><td>0.6</td><td>40</td><td>38</td><td>57</td><td>39</td></tr><tr><td>0.8</td><td>21</td><td>23</td><td>22</td><td>22</td></tr><tr><td>1.0</td><td>14</td><td>16</td><td>15</td><td>15</td></tr></table>	Concentration of sodium thiosulfate (g / dm ³)	Time 1 (s)	Time 2 (s)	Time 3 (s)	Mean time (s)	0.2	114	113	112	113	0.4	74	70	72	72	0.6	40	38	57	39	0.8	21	23	22	22	1.0	14	16	15	15			1	1	1	1
				Concentration of sodium thiosulfate (g / dm ³)	Time 1 (s)	Time 2 (s)	Time 3 (s)	Mean time (s)																																
				0.2	114	113	112	113																																
				0.4	74	70	72	72																																
				0.6	40	38	57	39																																
				0.8	21	23	22	22																																
				1.0	14	16	15	15																																
	(b)			award (2) for all points plotted correctly – tolerance $\pm\frac{1}{2}$ small square award (1) for 3 or 4 points plotted correctly award (1) for suitable curve		3		3	2																															
	(c)			the higher the concentration the higher the rate (1) because there are more particles in the same volume (1) therefore more chance of (successful) collisions / more (successful) collisions per second / greater frequency of collisions (1) or reverse argument the lower the concentration the lower the rate (1) because there are fewer particles in the same volume (1) therefore less chance of (successful) collisions / fewer (successful) collisions per second / lower frequency of collisions (1)	3			3
