7	(a)			Si (1) award (1) for answer that identifies one property as metallic and another as non-metallic e.g. it has a high melting point but is brittle neutral answers it is a semiconductor it has metal and non-metal properties		2		2		
	(b)			The density of metals and non-metals increases ☐ The boiling point of metals increases but the boiling point of non-metals shows no trend ☒ The density of metals shows no trend but the density of non-metals decreases ☐ The boiling point of metals and non-metals shows no trend ☐ The density of metals increases but the density of non-metals shows no trend ☒ The boiling point of metals shows no trend but the boiling point of non-metals decreases ☐ The density of metals decreases but the density of non-metals shows no trend ☐			2	2
