

2. The diagram shows three reactions which are used to prepare soluble salts.

- (a) (i) Name compound **A**. [1]

.....

- (ii) Give the names of blue solution **B** and gas **C** formed in reaction 3. [2]

blue solution **B**

gas **C**

- (b) Write the balanced symbol equation for reaction 1. [2]

.....

- (c) Reaction 1 was repeated using magnesium instead of zinc. Explain the difference, if any, that you would expect to see. [2]

.....

.....

.....
