

2. (a) State the difference between *baryons* and *mesons* in terms of quark make-up. [2]

.....

.....

.....

- (b) When two protons collide, the following interaction may occur, where x is an unknown particle:

- (i) The π^0 is a meson which carries no charge. State its quark make-up. [1]

.....

- (ii) Identify particle x , explaining how you use the law of conservation of baryon number and one other conservation law. [3]

.....

.....

.....

.....

.....

- (iii) State how lepton number is conserved in the above interaction. [1]

.....

.....

- (c) A π^0 decays in a typical time of 8×10^{-17} s into two photons as shown. State which force is involved in this interaction, giving **two** reasons for your answer. [3]
