					AO1	AO2	AO3	Total	Maths	Prac
5	(a)			QER Indicative content During rest (0-20s) aerobic respiration occurring there is no oxygen debt. During exercise(20-60s) anaerobic respiration increases as oxygen debt increases. Aerobic respiration also increases -Max oxygen uptake 2.5dm³ Recovery (60-100s) aerobic respiration slows as oxygen debt decreases. Anaerobic respiration stops. 5-6 marks Candidates describe the graph and link to aerobic and anaerobic respiration and rate of oxygen uptake/demand. <i>There is a sustained line of reasoning which is coherent, relevant, substantiated and logically structured. The candidate uses appropriate scientific terminology and accurate spelling, punctuation and grammar.</i> 3-4 marks Candidates describe the graph and some linking to aerobic or anaerobic respiration. <i>There is a line of reasoning which is partially coherent, largely relevant, supported by some evidence and with some structure. The candidate uses mainly appropriate scientific terminology and some accurate spelling, punctuation and grammar.</i>	2	2	2	6

				1-2 marks Candidates state the terms aerobic and anaerobic respiration OR candidates describe the graph without linking to aerobic and anaerobic respiration. <i>There is a basic line of reasoning which is not coherent, largely irrelevant, supported by limited evidence and with very little structure. The candidate used limited scientific terminology and inaccuracies in spelling, punctuation and grammar.</i> 0 marks No attempt made or no response worthy of credit.
