

Answer **all** questions in the spaces provided.

1. The production and processing of dairy products requires a number of processes.

(a) Statements **A-E** below show the main stages of making yoghurt. However the stages are **not** in the correct order.

**A** The equipment is sterilised

**B** Samples are taken to see if the yoghurt is ready

**C** The milk is pasteurised by heating

**D** The bacterial culture is added to the pasteurised milk and left at 46 °C for about four hours

**E** Flavours and colours are added, then the yoghurt is packaged

(i) Use the letters **B, C, D**, to arrange the stages in the correct order in the boxes below. [2]

|          |       |       |       |          |
|----------|-------|-------|-------|----------|
| <b>A</b> | ..... | ..... | ..... | <b>E</b> |
|----------|-------|-------|-------|----------|

(ii) Underline the type of microorganism used in this process. [1]

**fungus      bacterium      virus**

(iii) State **one** reason why the equipment should be sterilised before use. [1]

.....

(iv) State why the milk is pasteurised during the process. [1]

.....

- (b) (i) Whole milk, semi-skimmed milk and skimmed milk are available in supermarkets. Complete the following sentence. [2]

Semi-skimmed milk is made by skimming ..... from  
..... milk.

- (ii) Complete the following sentences about homogenisation of milk by underlining the correct word in the brackets.

The milk is pumped at high (**pressure** / **temperature** / **volume**) through very narrow tubes breaking up the fat globules. This prevents a layer of (**butter** / **cheese** / **cream**) forming on the milk. [2]
