

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
5				Indicative content AO1 • More reactive metal can displace a less reactive metal • Explanation of order of reactivity in terms of displacement • Mg displaces all of the metals • Cu does not displace any of the metals • Fe displaces Cu • Metals cannot displace themselves AO2 • Order of reactivity $\text{Mg} > \text{Fe} > \text{Cu}$ • Word / symbol equations for the reactions taking place	3	3		6		6
				5-6 marks Correct order of reactivity with clear reasoning in terms of reactions taking place; correct word/symbol equation <i>There is a sustained line of reasoning which is coherent, relevant, substantiated and logically structured. The candidate uses appropriate scientific terminology and accurate spelling, punctuation and grammar.</i> 3-4 marks Correct order of reactivity with attempt at explanation with reference to some reactions; reference to product(s) of reactions <i>There is a line of reasoning which is partially coherent, largely relevant, supported by some evidence and with some structure. The candidate uses mainly appropriate scientific terminology and some accurate spelling, punctuation and grammar.</i> 1-2 marks Correct description of results; some knowledge of displacement of less reactive metals <i>There is a basic line of reasoning which is not coherent, largely irrelevant, supported by limited evidence and with very little structure. The candidate uses limited scientific terminology and inaccuracies in spelling, punctuation and grammar.</i> 0 marks <i>No attempt made or answer worthy or any credit.</i>
