6				Indicative content limestone / calcium carbonate is heated <u>strongly</u> to convert into quicklime / calcium oxide glows orange / becomes softer left to cool and <u>small</u> amount of water is added to quicklime to produce slaked lime / calcium hydroxide fizzing / hissing / exothermic reaction solid crumbles calcium carbonate → calcium oxide + carbon dioxide $\text{CaCO}_3 \rightarrow \text{CaO} + \text{CO}_2$ calcium oxide + water → calcium hydroxide $\text{CaO} + \text{H}_2\text{O} \rightarrow \text{Ca(OH)}_2$ 5-6 marks Gives methods and observations, balanced symbol equations <i>There is a sustained line of reasoning which is coherent, relevant, substantiated and logically structured. The candidate uses appropriate scientific terminology and accurate spelling, punctuation and grammar.</i> 3-4 marks Some details of methods and observations, attempt at symbol equations <i>There is a line of reasoning which is partially coherent, largely relevant, supported by some evidence and with some structure. The candidate uses mainly appropriate scientific terminology and some accurate spelling, punctuation and grammar.</i> 1-2 marks Some details of method or observations, attempt at word equations <i>There is a basic line of reasoning which is not coherent, largely irrelevant, supported by limited evidence and with very little structure. The candidate uses limited scientific terminology and inaccuracies in spelling, punctuation and grammar.</i> 0 marks <i>No attempt made or no response worthy of credit.</i>	6			6		3
