		Compound	Flame test colour	Symbol of ion	Observation on adding silver nitrate solution	Symbol of ion																			
S	brick red	Ca ²⁺	yellow precipitate	I ⁻																					
T	apple green	Ba ²⁺	white precipitate	Cl ⁻																					
		(ii)		award (1) for any of following the yellow would hide the white precipitate it would look (pale) yellow (like iodide) / cream (like bromide) there would be a mixture of two precipitates it would not be possible to distinguish between the colours			1	1		1															
	(b)			Ag⁺(aq) + Cl⁻(aq) → AgCl(s) award (1) for ions award (1) for product formula award (1) for state symbols – can only be awarded if ions and product are correct		3		3
