

4. The surface of the Earth is divided into a number of tectonic plates. These plates are constantly moving.

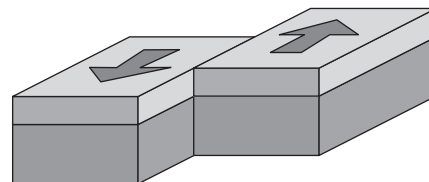

Plate boundaries can be classified according to the direction of movement of the plates. The three main types of boundary are shown below.

A

B

C

conservative

destructive

constructive

- (a) Choose the name of each type of boundary from the box.

[2]

A

B

C

- (b) Describe what happens as a result of the movement shown at boundary **A**.
