Examiner only

8. The reactivity of the halogens changes on going down the group.

You are provided with samples of the halogens and solutions of the halides shown below.

Halogen	Halide solution
chlorine	sodium chloride
bromine	sodium bromide
iodine	sodium iodide

State how you would carry out an investigation to determine the order of reactivity of the halogens using these chemicals.

Describe the observations made and explain how these are used to draw your conclusion.

Include an equation in your answer. [6 QER]
