

3. Clara is studying the structure and function of cells. The images below show animal and plant cells.

(a) Complete the table below to show which parts are present in animal cells. [3]

| Part          | Plant cells | Animal cells<br>(✓ or ×) |
|---------------|-------------|--------------------------|
| cell wall     | ✓           | ×                        |
| cytoplasm     | ✓           | ✓                        |
| chloroplast   | ✓           | ×                        |
| nucleus       | ✓           | .....                    |
| cell membrane | ✓           | .....                    |
| vacuole       | ✓           | .....                    |

Examiner  
only

(b) Describe the functions of the parts of a **plant cell** listed in the table.
