

Question			Marking details	Marks available					
				AO1	AO2	AO3	Total	Maths	Prac
7	(a)	(i)	Mean = 1.87 [V] (1) $\frac{1.93-1.81}{2} = 0.06$ (1) $\frac{0.06 \text{ ecf}}{1.87 \text{ ecf}} \times 100 = 3$ [%] (1) No sig fig penalty		3		3	3	3
		(ii)	Substitution and rearrangement i.e. $\lambda = \frac{hc}{e \times 1.87 \text{ ecf}}$ (1) $= 6.6[5] \times 10^{-7}$ [m](1) Absolute uncertainty= $0.2[0] \times 10^{-7}$ [m] ecf (1) Uncertainty quoted to only 1 or 2 sig figs		3		3	3	3
	(b)		Use an ammeter [and record pd when current increases above 0 A or a few mA] / use a light meter Accept light sensor or light detector Don't accept use a camera			1	1		1
